PROFESSIONAL SUMMARY

Frontend-focused developer with 1.5+ years of experience shipping production features on live client websites using React, Next.js, and TypeScript. Growing full-stack range across Node.js, PostgreSQL, Drizzle ORM, and authentication/RBAC systems, gained by owning features end-to-end — from CMS schema design and API integration to deployment, performance tuning, and SEO. Comfortable working inside Git-based, multi-developer workflows and has mentored junior interns.

TECHNICAL SKILLS

Frontend: React.js, Next.js (App Router), React Native (Expo), JavaScript (ES6+), TypeScript, Tailwind CSS, Zustand, TanStack Query, React Hook Form, Radix UI, Shadcn UI

Backend, Database & CMS: Node.js, Express, REST APIs, Server Actions, PostgreSQL, MySQL, MongoDB, Prisma, Drizzle ORM, JWT Auth, NextAuth, RBAC, Stripe Integration, Headless CMS (Nextly), Microsoft Dynamics 365 Integration, Google Maps API

Tools & DevOps: Git, GitHub, GitHub Actions (CI/CD), Docker, Vercel, Coolify, Postman, VS Code

Performance, SEO & Compliance: Lighthouse Optimization, Core Web Vitals, Technical SEO, JSON-LD Structured Data, Google Tag Manager, Content Security Policy, Cookie Consent (Osano)

PROFESSIONAL EXPERIENCE

Revnix (formerly Revnix Technologies) — Haripur, KPK, Pakistan

Frontend Developer — Oct 2025 – Present

- Ship full-stack features across multiple live client websites (21st Century Equipment, 4Rivers Equipment, The Backyard), spanning UI, CMS/backend logic, and third-party integrations — inside a Git-based, multi-developer workflow.
- Design content schemas and admin UX for a headless CMS (Nextly), adding conditional field logic and validation that cut content-entry errors for non-technical editors.
- Implement JWT authentication and role-based access control (RBAC), restricting protected routes and analytics dashboards to authorized users.
- Integrate Stripe payments and streamlined checkout by auto-filling user's saved data; build product interaction features (Favourites, Price Watch, Compare, Share) with Zustand state and CMS-backed persistence.
- Improve site performance and Core Web Vitals by auditing and deferring third-party scripts (Google Tag Manager, ad-tech/marketing pixels, click-fraud tracking) until user interaction, and by adding technical SEO, JSON-LD structured data, llms.txt, sitemap.xml, robots.txt, Open Graph metadata, across storefront rebuilds.
- Implement privacy/security hardening (Osano cookie consent, Content-Security-Policy, reCAPTCHA); integrate marketing/CRM tooling — a Dynamics 365 lead-capture proxy, a custom Google Reviews CMS plugin (Google Places API), and Elfsight feed embeds.
- Build an internal icon-generation tool, role management, a review-and-approval workflow with reviewer tracking, and a premium tier via Lemon Squeezy, deployed and maintained on Coolify.
- Resolve cross-environment production issues (a full CMS framework upgrade, a secure server-to-server backup migration) with zero data loss; mentor 2 interns on JavaScript/HTML/React fundamentals and complete web workflows.

Frontend Developer Intern — Apr 2025 – Sep 2025

- Learned full-stack fundamentals — HTML, CSS, JavaScript, Next.js, TypeScript, MongoDB, and NextAuth — by fixing bugs and improving performance and SEO on internal sites.
- Applied that learning by independently building a full-stack Role & Permission-Based CRUD app (Next.js, TypeScript, MongoDB, NextAuth) with authentication and complete CRUD operations.

Rhombix Technologies — Lahore, Pakistan (Remote) | **Web Developer Intern** — Oct 2025 – Jan 2026

Built frontend apps (library management system, music player) in React/JS/HTML/CSS — search, categorization, playlists, dynamic UI.

BISP — Islamabad, Pakistan | **Web Developer Intern** — Jul 2024 – Sep 2024

Contributed to full-stack development (C#/.NET, Bootstrap, HTML/CSS) at Benazir Income Support Programme Headquarters, building responsive interfaces in a government environment.

PROJECTS

- **Betterment (Independence Day Hackathon)** — Built a full-stack civic-engagement mobile app (React Native/Expo, Node.js/Express, PostgreSQL/Prisma) in, with a gamification engine (XP, levels, streaks, achievements), AI-based photo verification (Google Gemini vision), and Urdu-language support; won a placement for Revnix at the Build for Pakistan “Best Software Solution” hackathon (Aug 2026).

EDUCATION & CERTIFICATIONS

Bachelor of Science in Software Engineering — University of Haripur, KPK, Pakistan | CGPA: 3.55/4.0 Nov 2021 – Jun 2025

Google Cybersecurity Professional Certificate — Coursera | Apr 2024 – Jul 2024
